-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 3 is objected to because of the following informalities: A claim should end with a period ".", the comma "," used at the end of claim 3 is improper and needs to be replaced by a period ".".
2. Claims 4, 8 and 11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4, 8 and 11 should not have been treated on the merits but since the reference disclose their limitations anyway, the Examiner will include them in the rejection below.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Rudow et al (US 2002/0011949 A1).

As per claims 1, 5, 9 and 10, Rudow discloses a process for generating a map of a hole of a golf course, the map including at least one graduation showing the distance between a pin

and a fixed point on the hole, the process including the steps of: taking a GPS reading of the location of the pin; and generating the map based on the reading (page 9, [0104]).

As per claim 2, Rudow discloses a process wherein the GPS reading is taken by placing a hand held GPS receiver over the pin (see fig. 1A).

As per claim 3, Rudow discloses a process wherein the GPS reading is taken by locating a pole mounted receiver in the pin (see fig. 1A).

As per claim 4, Rudow discloses a process wherein the map is generated by printing graduations on a card which Includes a graphic representation of the hole (see figs. 6, 7).

As per claim 6, Rudow discloses a system wherein the means for taking a GPS reading includes a handheld GPS receiver (page 2, [0018]).

As per claim 7, Rudow's system inherently can be a system wherein the means for taking GPS reading include a pole mounted GPS receiver.

As per claim 8, Rudow discloses a system wherein the means for generating a map inherently can include a printer as claimed.

As per claim 11, Rudow discloses a map produced by the process (see figs 6, 7).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
